Experience

Google New York, NY
Senior Software Engineer, Technical Lead Sep. 2024 - Present

- Designed and own the architecture for a shared integration platform that lets every GCP product team plug into a new AI experience; now consolidating similar experiences in existing products onto it.
- Leading 2 senior engineers to take agentic GCP workflows from zero to one, setting up model evals and agent infrastructure in **Kotlin**, **Python** and **Google ADK**.
- Led a team of 4 engineers owning the Console shell for all GCP products, improving reliability, theming infrastructure, and cross-product navigation.
- Defined the GCP Console's long-term vision with Product and UX: moving from rigid standards to modular infrastructure that lets teams customize their shell while keeping one unified experience.

Google New York, NY
Software Engineer III Sep. 2022 - Sep. 2024

- Built a multi-tier GraphQL caching layer with persisted queries in **Java** as a platform feature used across all of GCP, shrinking JS bundles and cutting request latency.
- Developed a **Go**-based CLI tool to auto-diagnose and remediate frequent development blockers, reducing friction and boosting developer productivity.
- Hosted 3 SWE interns across separate cycles, scoping and guiding projects that built modular frameworks for in-product experiences in GCP. All 3 returned full-time.

Google Sunnyvale, CA
Software Engineer, Site Reliability Jan. 2021 - Sep. 2022

- Developed new VM-to-VM communication features for Google Cloud's control plane to support internal products on different stacks, which let an internal product shut down its own GCP fork.
- Built **Python** tools that pinpointed root causes during VPC networking incidents, cutting on-call response time; adopted by the full on-call team.

Programming Skills

Languages: Go, Python, Java, Kotlin, C++, C, Bash, SQL, TypeScript, JavaScript
Frameworks and Tools: Google ADK, GraphQL, gRPC, Stubby, Google Pub/Sub, Datastore, App Engine, Docker, Git, React

Education

University of Victoria Victoria, BC
B.Sc. in Computer Science, With Distinction (GPA: 3.8/4.0, Dean's List) Dec. 2020

- Undergraduate Research in Parallel Skyline Groups Computation
