EXPERIENCE

Google

Senior Software Engineer, Technical Lead

New York, NY

Jan. 2022 - Present

- Developing AI Agents using **Kotlin**, **Google ADK** and **Python** to enable contextual agentic experiences
- Led a team of 4 engineers to enhance contextual navigation and cross-product discoverability in the GCP Console, resulting in improved user engagement across key services.
- Partnered with Product and UX to define the long-term vision for the GCP Console, aligning roadmap priorities across teams.
- Architected and deployed a multi-tier GraphQL caching layer in **Java**, cutting latency by 5% across Google Cloud applications.
- Developed a **Go**-based CLI tool to auto-diagnose and remediate frequent development blockers, reducing friction and boosting developer productivity.
- Drove a focused 3-week quality sprint that reduced technical debt by 20% and increased unit test coverage by 30% across the codebase.

Google

Software Engineer, Site Reliability

Sunnyvale, CA

Jan. 2021 - Dec. 2021

- Developed monitoring tools for Google's Virtual Private Clouds using **Python**, resulting in increased service availability.
- Onboarded new control-plane components for global internal services using **Python** and internal cluster management tools, streamlining cross-team deployments.
- Provided technical guidance as a Project Advisor for Google SPS, a program where students build a web application using Google APIs, **Java**, and **JavaScript**.

Google

Software Engineering Intern

Sunnyvale, CA

Feb. 2020 - May 2020

- Developed an automated debugging framework to analyze system failures during on-calls using **Go**, **Stubby**, and **Cloud Pub/Sub**, reducing incident resolution time.
- Implemented multi-threaded resource libraries in **Go** and **Dremel** to collect distributed metrics.
- Optimized internal monitoring infrastructure by eliminating redundancies in cross-functional libraries.

Bold Commerce

Software Developer Intern

Winnipeg, MB

May 2019 - Aug. 2019

- Created highly scalable microservices to serve over 100,000 merchants using **Go** and **Docker**.
- Implemented REST APIs to create and manage draft orders on various e-commerce platforms using **Go**.
- Designed new storefront widget prototypes for event creation and ticket distribution using **React**.

PROGRAMMING SKILLS

Languages: Go, Python, Java, C++, Bash, C, SQL, TypeScript, JavaScript, VBA

Frameworks and Tools: Git, App Engine, Google Pub/Sub, Datastore, gRPC, Stubby, Docker, Selenium, React, Angular, Django

EDUCATION

University of Victoria

B.Sc. in Computer Science, With Distinction (GPA: 3.8/4.0, Dean's List)

Victoria, BC

Dec. 2020

- Undergraduate Research in Parallel Skyline Groups Computation
